SRINAKHARINWIROT
UNIVERSITY
Sustainable Development Goals Report
2023

TABLE OF CONTENT

Philosophy

Education is Growth

The five growth respects are

1. Growth of faith: trust in life, roles and one's own duty.
2. Growth of sacred precepts: ethics and goodness.
3. Growth of attentiveness: thoughtfulness and continuous learning.
4. Growth of abandonment: generosity and kindness to others
5. Growth of wisdom: living, thinking, and doing with intellect.

Vision

Learning university for society

Missions

1. Produce and develop people of all ages with the desirable traits for national development through excellent learning process
2. Create high quality research and innovation for sustainable social development
3. Deliver valuable academic services based on social responsibility
4. Study, preserve, and enrich cultures and arts
5. Develop an administration system based on excellence and good governance

Core Values

S Social Responsibility   **W** Work Smart   **U** Unity

Organizational Culture

1. Cultivate politeness and humility.
2. Instill a collective mindset and prioritize public interests.
3. Achieve academic excellence and uphold moral integrity.

Core Competencies

1. Expertise in learning provision of the modern disciplines at international quality standards
2. Participatory academic services for a resilient and sustainable society

HIGHLIGHTS

Instutute

Research

Srinakharinwirot University (SWU) sets the research direction based on the 13th National economic and social developmental plan (2023-2027), 20-year National research plan and University's vision: to be "Learning university for society". SWU research and innovation also follows the university's pledge for the achievement of UN-SDG. Therefore, SWU's research strategies are to produce high quality research and innovations which are beneficial in sustainable development of the country in terms of economy, society and environment. Four research themes; frontier and global research, high value-added economy, high opportunity society and eco-friendly living were announced; these themes covered 12 specific research clusters that were aligned with the 16 areas of UN-SDG, such as poverty reduction and adequate social protection (SDG1), circular economy and low carbon society (SDG 6,7,13), advance medicine (SDG 3,10) and innovative education (SDG1,2,4). The number of SWU's research publications that were aligned with the UN-SDG increased substantially from 193 publications in 2022 to 277 publications in 2023. These SDG research publications covered all 16 areas of UN-SDG, with the highest number in the SDG3, good health and well-being (108 publications), followed by SDG7, affordable and clean energy (28 publications) and SDG 4, Quality education (24 publications). Apart from publications, several research projects were implemented in the community and society for helping in sustainable development of the country. Examples of these research projects and their SDG impacts are listed.

"The Creation of Network and Mechanism to Help Enhance the Elderly Employability in Thai Society" by Associate Professor Cholvit Jearajit and team demonstrated the social, policy and economic impacts corresponded to SDGs 3,4,8,16. This research project promoted the employment skills of elderly, covering financial, health, and digital aspects, alongside occupational training, which helped them develop the necessary skills for self-reliance in a changing world. This project also initiated the formation of senior community enterprise networks within the province which encouraged collective action, facilitated knowledge exchange, and promotes joint activities. As a result, the quality of life and incomes of the elderly in Thai society were improved.

"The community organization council communicative community rights and water resource management in Suphan Buri province" by Associate Professor Poom Moolsilpa and team emphasized SDGs 2,6,12,16 by supporting the role of Community Organization Council to communicate community rights, prevent conflicts, establish strategic water flow management and promote sustainable water resources management in Suphan Buri Province. As a result, this project promoted sustainable agriculture through the participation in water resources management which secured farmers' incomes and reduce the risk of monoculture farming.

"Plant and herbal research studies" from Center for excellence in plant and herbal innovation research (CEPHIR) by Assistant Professor Pattarawit Rukthong and team supported SDGs 2,3,4,9,12,15. CEFHIR focused on antioxidant properties of Wolffia and encouraged farmers and small community enterprises to cultivate Wolffia in Smart Farm greenhouses. CEPHIR fosters interdisciplinary collaboration among science, food science, and engineering fields to develop mobile applications for food safety databases and Smart Farming under the BCG (Bio-Circular-Green) economic model. This helped create value-added agricultural products for community enterprises in Ban Chang subdistrict, U-Thai district, Phra Nakhon Si Ayutthaya province and expanded to the Department of Climate Change and Environment to establish learning centers which will benefit society and the environment in a larger scale.

Last example is the development of "An Application of Geographic Information System for Participatory Analysis of Wildfire Risk Area in Chiang Rai Province" by Assistant Professor Wuttichai Boonpook and team. Supporting SDG 11, this project created risk maps for forest fire occurrence which helped in planning and monitoring forest fires and planning community involvement in preventing burning in the area. This application has been adopted by the government for sustainable solutions in each area, such as setting burning periods and promoting the cultivation of alternative crops.

Teaching

Outreach

ASOK MODEL
ASOK Model project aimed to advance the well-being of urban communities – The university is capable of contributing to sustainable development under the strategic plan to collaborate with society. Emphasis on the creation of a prototype to improve the urban communities' well-being in the Asok area, using an area-based approach.

ONGKHARAK MODEL
The ONGKHARAK Model aims to enhance the community of Ongkharak District in Nakhon Nayok Province – by setting up and building upon the knowledge in improving the integrated well-being of the community. It improves upon the integrated well-being network by definitive collaboration with local organizations, utilizing the community's cultural resources as a base.

Stewardship

OUTSTANDING PROJECT

Memorandum of Understanding for Cooperation Between Srinakharinwirot University and Carbon Neutrality Agencies by 2040 (SWU Carbon Neutrality by 2040)

This MOU has been made between Srinakharinwirot University & faculties, colleges, Institutes, offices, and agencies within the university; SWU towards achieving Carbon Neutrality within Srinakharinwirot University. The university is conscious of the causes and effects of Climate Change & strives to find a path to mitigate the effects of greenhouse gas emissions, to move toward a low-emission society and Carbon Neutrality within 2040. Which aligned with the university's framework of physical development under the national goal of achieving Carbon Neutrality within 2050 and Net Zero GHG emission within 2065, as announced during the COP27 conference.
